OUTPUT:-

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

3

enter values for opeartions : 5000 6

Values on which opeartion is going to be performed are: 5000 6

error: product is too large to calculate

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

2

enter values for opeartions :

500

499

Values on which opeartion is going to be performed are: 500 499

subtraction = 1

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

4

enter values for opeartions :

468

0

Values on which opeartion is going to be performed are: 468 0

an error occured

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

1

enter values for opeartions :

450

445

Values on which opeartion is going to be performed are: 450 445

addition = 895

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

5

program exited successfully
