OUTPUT:-

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

1

enter values for opeartions :

7000 600

Values on which opeartion is going to be performed are: 7000 600

addition = 7600

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

2

enter values for opeartions :

2000000 1

Values on which opeartion is going to be performed are: 2e+06 1

subtraction = 2e+06

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

3

enter values for opeartions :

6000000 500000

Values on which opeartion is going to be performed are: 6e+06 500000

Enter valid values

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

4

enter values for opeartions :

700 0

Values on which opeartion is going to be performed are: 700 0

Enter valid values

operation to perform

1.addition

2.subtraction

3.multiplication

4.division

5.exit

enter choice

5

program exited successfully
